In Oceans Deep Nov 25 2022 In this masterful account in the spirit of Bill Bryson and Ian Frazier, a longtime deep-sea diver masterfully weaves together the science and history of Earth's last remaining frontier: the sea. In an age of unprecedented exploration and innovation, our oceans remain largely unknown, and endlessly fascinating: full of mystery, danger, beauty, and inspiration. *In Oceans Deep* celebrates the daring pioneers who tested the limits of what the human body can endure under water: free divers able to reach 300 feet on a single breath; engineers and scientists who uncovered the secrets of decompression; teenagers who built their own diving gear from discarded boilers and garden hoses in the 1930s; saturation divers who lived under water for weeks at a time in the 1960s; and the trailblazing men who voluntarily breathed experimental gases at pressures sufficient to trigger insanity. Tracing both the little-known history and exciting future of how we travel and study the depths, Streever's captivating journey includes seventeenth-century leather-hulled submarines, their nuclear-powered descendants, a workshop where luxury submersibles are built for billionaire clients, and robots capable of roving unsupervised between continents, revolutionizing access to the ocean. In this far-flung trip to the wild, night-dark place of shipwrecks, trapped submariners, oil wells, innovative technologies, and people willing to risk their lives while challenging the deep, we discover all the adventures our seas have to offer -- and why they are in such dire need of conservation.

Adventures in Bookbinding Feb 14 2022 Each project in this book combines bookbinding with a specific craft such as quilting, jewelry making, or polymer clay, and offer levels of expertise: basic, novice, and expert. Illustrated step-by-step instructions and photographs demonstrate how to construct the cover pages, and a unique binding technique, easy enough for a beginner to master. Each project also features two other versions with the same binding geared to those with more or less experience. The novice version is for those who have no knowledge of the craft and want shortcuts, but love the look. For the quilter's book, for example, vintage quilt pieces become the covers so all that's needed in the binding. Or if you're interested in wool felting use an old sweater. This offers great opportunities for upcycling. The expert version is for those who have a great deal of knowledge and proficiency of a certain craft - the master art quilter, for example. For this version, an expert guest artist has created the cover and the author has created the binding. This offers yet another creative opportunity - the collaborative project. Since crafters often get involved with round-robins and other shared endeavors, this will show them yet another way to combine their skills. No other craft book offers the possibilities and challenges that Adventures in Bookbinding does. Readers will return to it again and again to find inspiration and ideas.

Adventure Finance Sep 11 2021 The venture capital model doesn't work—at least not for 99% of startups and small businesses. In this 99% are a lot of companies with incredible potential: businesses headed by female founders and those from diverse racial backgrounds, organizations headquartered outside of venture capital hubs, and purpose-driven enterprises that are creating social and environmental impact alongside financial success. Counter to what the press-savvy venture capital world would have you believe, there are a lot of funding options out there for startups and small businesses. *Adventure Finance* is designed to help you understand some of these options, and walk you through real examples of how other founders and funders have put them to use. In simple, approachable language, the book breaks down the different types of funding options available from revenue-based financing to recoverable grants to redeemable equity to distributed ownership and more. Through a mix of storytelling and frameworks, based on a decade of research and experience in investing in early-stage companies, this book will give you the ability to determine how each of these structures can contribute to your own funding journey. The goal for this book is to shift the conversation about startup funding and help founders and funders widen the spectrum of “mainstream” investment options in order to make the venture financing world more inclusive and purpose-driven.

A Volunteer's Adventures Oct 01 2020 John William De Forest (1826-1906), a native of Connecticut, enjoyed a long career as a prolific writer, mainly of fiction. During the Civil War he was a captain in the 12th Connecticut Volunteers, taking part in the capture of New Orleans, the Port Hudson campaign, and the Battle of Cedar Creek, Virginia. After the war, he served as a subassistant district commissioner for the Freedmen's Bureau in Greenville, South Carolina. *A Volunteer's Adventures*, first published in 1946, is De Forest's vivid description of his experiences at war. It consists of letters to his wife during his service, supplemented by six articles published in Harper's New Monthly Magazine and *Galaxy* between 1864 and 1868. De Forest intended to compile these pieces into a book but never did. James H. Croushore finally accomplished the task, adding chapter divisions with introductory notes to give form and continuity to the whole. The result is a first-rate personal war narrative - recently named one of the one hundred finest Civil War books by Civil War magazine - more than half of which deals with Louisiana from De Forest's Yankee perspective.
