English for Primary Teachers Apr 06 2021 The book aims to build teachers' confidence in their ability to use English effectively, at the same time as providing advice and techniques for primary English teachers. The book is written in an accessible, easy-to-follow style and encourages a positive attitude towards using English in the primary classroom. The first unit asks teachers to reflect on the processes of language learning, to examine ways to create effective learning conditions in class, and introduces them to the study methods used in the book. The units follow the processes of natural language acquisition and the pattern of school education, so the order is: listening activities, speaking activities, reading, and writing. There are two units on using stories, with a final unit on integrating coursebook activities and lesson planning. The content of the syllabus is derived largely from English lessons recorded by around 20 different teachers in different countries, to show that the examples and expressions used are real ones that are used by primary teachers the world over. The Language Study syllabus is graded, beginning in Unit 1 with very basic classroom instructions within a typical lesson framework, going on to more specific language relevant to particular activity types, and later to longer stretches of English, such as storytelling. The book encourages teachers to practise the language activities with a colleague and/or record themselves on a personal cassette doing the language practice activities in English. A free CD gives examples of classroom language from real classrooms, with pronunciation exercises.

Primary School English-Language Education in Asia Mar 18 2022 In Asia, English is no longer a foreign language but a key resource for education, government, business and the general public. Whereas thirty years ago, British and American experts believed that the best way to improve the quality of English teaching was to cancel any programs below the secondary level, Asian nations as well as European are now introducing English in primary school. But there are major obstacles to overcome: the training of enough local teachers or the hiring of English speakers, the preparation of suitable teaching materials, the development of useful tests, and the design of workable curriculums. The chapters in this book, written by leading English-teaching professionals in seven Asian countries and originally delivered at the 2010 annual conference of Asia TEFL which took place in Hanoi, Vietnam, describe and analyze national policies and how they are implemented. The coverage is wide: China with its huge number of students learning English, Japan working to make the transition from elementary to secondary school seamless, Singapore continuing to use English as medium of instruction for its multilingual population, Korea developing English education policies to recognize the increased role of English alongside the national language, India building on its colonial past to make English an economic resource, Vietnam fitting English into a program of national rebuilding, and Taiwan spreading its English teaching outside the national capital. This is not a report of the views of outside experts, but of local experiences understood by local scholars of international standing. Policy makers, educators, researchers and scholars will be able to gain valuable insights from Asian experts.

Teacher beliefs of a trained and untrained English Primary teacher. To what extent do they differ and influence their teaching? May 08 2021 Seminar paper from the year 2019 in the subject English Language and Literature Studies - Linguistics, grade: 1,7, Bielefeld University, language: English, abstract: Many studies on different styles of teaching and its impact on the student's learning success have been performed, while only a few studies have dealt with teachers as persons and in which way their beliefs influence their teaching. In addition, these studies do not specifically address English primary school teachers and their beliefs in their own professional record. As the BIG-Studie is the only German research so far that, at least approximately, investigated on behalf of this subject, it may be concluded that there is an apparent need for further study on that area of research. Thus, this study aims to investigate the relationship between teaching and factors such as teacher beliefs, professional records and educational backgrounds. The sample group for the study consisted of two teachers from one elementary school, of which one of them is an untrained English teacher whereas the other one is a trained English teacher. Data consist of two guided interviews and their transcripts. The collected data were used to provide a descriptive and comparative analysis to address the research questions and to help developing new structures and trainings for the purpose of fighting the shortage of English teachers. Findings could provide evidence that despite the public demand of hiring trained teachers, as they seem to be obligatory to ensure the lesson's quality, an untrained English teacher is able to compensate his lack of training since his teaching is rather similar to the teaching of a trained English teacher.

Decolonizing Primary English Language Teaching Apr 26 2020 This book tells the story of a project in Mexico which aimed to decolonize primary English teaching by building on research that suggests Indigenous students are struggling in educational systems and are discriminated against by the mainstream. Led by their instructor, a group of student teachers aspired to challenge the apparent world phenomenon that associates English with "progress" and make English work in favor of Indigenous and othered children's ways of being. The book uses stories as well as multimodality in the form of photos and videos to demonstrate how the English language can be used to open a dialogue with children about language ideologies. The approach helps to support minoritized and Indigenous languages and the development of respect for linguistic human rights worldwide.
